

# Celebrating Our 50th Anniversary with Aggressive Growth Plans

On our 50th birthday we're having a growth spurt. We've expanded our production facilities, added new equipment, earned high quality ratings from our customers on our mechanical and structural tubing and metal building components, invested in world-class technology and systems, and achieved ISO 9002 and QS certification.

Now we're growing --- entering new markets and adding new products:

- Tubular products for automotive suppliers and agricultural equipment
- ColorShield™ cleaned and primed structural steel tubing (HSS)
- First stage processing (cut-to-length, forming, bending of angles and welding)
- Manufacturing of components and specific parts for a variety of industries

Not bad for a fifty-year old. Give us a call. We'll reminisce --- about the future. Call us at (281) 494-0900 or e-mail us at [sales@prolamsausa.com](mailto:sales@prolamsausa.com).
