CLEARSHIELD™

UV Clear Protective Coatings

ClearShield™, Prolamsa's new UV clear, protective coatings for mechanical, HR and galvanized tubing provides superior chemical and corrosion-resistance, protects against corrosion, including white rust and supplies excellent scratch resistance.

ClearShield is easy to handle, doesn't stick during transportation and is ideal for operations that require a clean atmosphere. An extremely flexible coating, ClearShield

has low surface friction and high surface lubricity which makes it a good choice for applications which require bending and forming.

ClearShield is non-flammable, contains no VOCs and is not regulated by DOT. It's available on round, square and rectangular tubing.
