

Prolamsa Introduces **COLORSHIELD™** Cleaned and Primered Structural Steel Tubing

Saves You Time and Money

Prolamsa's new ColorShield™, cleaned and primered structural steel tubing (HSS). It improves productivity, eliminates the need for solvents and cleaners, and increases storage life.

ColorShield's key benefits:

- It's water-based primer dries in a few seconds, provides an excellent base for powder and paint applications. For hot-dip galvanizing, ColorShield is easily removable with standard treatments.
- Increases storage life
- Reduces or eliminates the need for solvents and cleaners
- Welds easily and safely
- Is produced to the highest quality standards. ASTM specs; ISO 9002 and QS-9000 certification
- Is available in squares up to 5"x 5", rectangles up to 6" x 4", and rounds up to 6 5/8". ColorShield comes in a full range of sizes and wall thicknesses.
- Applications include construction, transportation, rack and storage systems, agricultural and industrial equipment, bridges, highway signs, lamp posts, handrails and guardrails.

Prolamsa has a great deal for you. To get a quote on your next job, call (281) 494-0900 or e-mail: sales@prolamsausa.com.
