

We're Meeting a Big Demand for Smaller Sizes

When we spotted the growing demand for smaller structural steel tubing (HSS), we made a significant investment: a tubing mill that produces HSS in 2" and 2 1/2" squares with wall thicknesses of 1/4" and 3/16". Other HSS sizes include squares up to 5" ... rounds up to 6 5/8" ... and rectangles up to 6" x 4", in gauges from 0.120" to 0.280".

We've got mechanical tubing, too, in rounds from 1/2" to 3" ... squares from 1/2" to 2 1/2" ... and rectangles up to 4" x 1 1/2", in gauges from 0.028 to 0.134.

Other CNC Laser Cutting and Value-Added Products and Services

We also offer a wide range of tubing products and components for a variety of applications. For instance, we make tubing for axels and rollover protected structure tubing (ROPS), then we add value to it with cut-to-length and CNC laser cutting capabilities.

Add it all up and it's clear that Prolamsa is the tubing source that has whatever you need, no matter how big. Or how small.
