

Value-Added Processing

It's a long way to China, Korea and Taiwan. Prolamsa is right next door, and we're working hard to increase your profit margins by providing first-stage processing — cut-to-length, forming, bending, angles, welding and other value-added services — of our as-welded mechanical and structural steel (HSS) tubular products, and our metal building components and shapes. You'll

save money on equipment and capital costs, labor, scrap charges and production time.

We're also producing fence panels, carport component kits, scaffolding parts and automotive products. We'll be happy to provide quotes, discuss special projects or long-term arrangements.

Value-added processing. From Prolamsa. Anything to save you a buck.
